

SONDAGE JOURNÉE DES NOUVEAUX ENTRANTS

05/11/2024

1. Is the welcome event once a year useful overall?

2. After this event, do you feel that you know whom to ask to, for any information needed that is related to your integration in the lab?

RÉPONSE	NOMBRE
yes	4
Yes	3
Yes we have an overall view of the useful tools and where to ask for info if needed	1
Yes, the organisation of the lab was conveyed very clearly.	1
Yes, it was very information and a lot of relevant information.	1
Yes	1
It is still a little bit messy in my head, but normally I took note of every contact I needed.	1
I'd say yes	1

3. What are the positive points about the presentation?

RÉPONSE	NOMBRE
To know new information about laboratory process	1
Through the presentations, I can understand which person I need to go to when I have a problem	1
*They were objective *A lot of topics were covered *Everybody presenting themselves in the beginning was very interesting *The interactions in the coffee break and in the pizza session *Discovering MEMO	1
The overall presentation of services and tools	1
The MEMO presentation is the best positive part as it helps everyone to integrate in the lab life, and then overall all the presentations contains usefull informations.	1
Nice atmosphere	1
Most of the presentations were in english, and the two that weren't were translated to english. They were short and concise, with clear and relevant content. Provided not only the names but also the faces of many people to who one needs to see/talk to in different situations, making it easier to approach them when needed.	1
meeting every newcomer and cornerstone staff	1
It covers a lot of different topics	1
For a newcomer I think it was very explanatory and informative.	1
clear and efficace	1
all the infos are present	1
all needed informations are presented	1

4. What are the negative points about the presentations?

RÉPONSE	NOMBRE
The frequency, once a year is a good frequency to gather enough people. However some newcomer arrived more than 10 months ago.	1
Some of the presentations were a bit short, I only knew what department he belonged to, but wasn't sure exactly what to contact him about	1
Overall presentation of the lab may be a little bit too long, I'd like to focus more on services	1
nothing too negative	1
Nothing comes to mind.	1
No one	1
None.	1
none	1
Maybe the french presentations ? But as a french speaker it did not disturbed me, so I can't really tell.	1
I would like the keys points to be sent by email so that I can have them handy	1
but sometimes too much info	1
A representative from the university would be appreciated	1
A lot of links were presented. I suggest, after the presentation, compile all these links in one file and sending it to the students. Something like I.T. SESSION *Fresnel email: link *MatLab access: link ... SESSION: *Doubts: *CNRS researchers: ... It can be better than the way it is presented in the filed delivered in the end of the event Moreover, this file is a little bit outdated (specially the part about the links). Some among them are not working And having vegan options/pizzas ^^	1

5. Is there a missing topic that you would have liked to be covered?

RÉPONSE	NOMBRE
no	4
No	3
The services and tools that universities offer, teaching and supervision of internship students possibilities from the university	1
No.	1
Nah	1
Maybe some focus on the options of French courses here. The links about this theme presented in the file which was delivered in the end of the presentation don't work well, for example.	1
Maybe food options on campus?	1
I think it would've been good to introduce a bit more how the different personel systems work - e.g. how to apply for vacations, register activities etc, but also necessary newcomers tasks in employer specific systems like Ariane (e.g. how to update your address, bank account for the salary, demand travel reimbursement).	1

6. Which topics do you think deserve more time?

RÉPONSE	NOMBRE
security	1
said before	1
Nothing	1
none	1
Maybe the IT and Finances, because they are a little bit more bureaucratic	1
I think overall the time slots were very fair.	1
I think it was good as it was	1
I don't know.	1
How to use the systems which we use from the start and at minimum on a monthly basis, such as Agate tempo, Etamine missions, Notilus etc.	1
Component relating to reimbursement of expenses	1
all topics are well distributed over the morning	1
All ok	1

7. Which topics could be skipped?

RÉPONSE	NOMBRE
	4
said before	1
No one	1
None	1
none	1
no	1
I wouldn't skip it, but perhaps less time on the instrumentation part.	1
I think it was good as it was	1
I think everything that was there was good and relevant.	1
I don't think.	1

8. Did the fact that the slides were in English and some presentations in French prevent you from understanding the information?

RÉPONSE	NOMBRE
no	3
No	2
yes, a little bit	1
Not at all Y	1
Nope (I'm french)	1
no, but i am french.	1
I think so, because it caters to both French and English speakers	1
I think it was good that the slides were at least in english, but not knowing french will, i think that some presentations were in french made it more difficult to follow (but it helped a lot that they were then at least translated to english by Sophie)	1
For me no, but as I am french speaker it is not representative.	1
As a non-French speaker I did not have any problems with this. And thanks to the people showing effort to speak in English.	1

9. Did you feel comfortable enough to ask questions and interact with administrative staff?

RÉPONSE	NOMBRE
yes	6
Yes	3
Yes, they seemed very welcoming and warm.	1
Yes better after this presentation	1
Yes !	1
I don't know, I didn't had questions so I didn't even though about asking one.	1
